SKILLS LAB

Skills Lab Pty Ltd RTO Code 45486

Edge Computing in Industry 4.0 (Accelerated)

Gain a greater understanding of Industry 4.0 and enjoy a sneak peek into the learning provided in the Diploma of Applied Technologies, with this practical workshop on Edge Computing.

Participants will have the opportunity to build an Edge Gateway from the ground up, gathering manufacturing-like data, transmitting it to a cloud-based database, and developing a web dashboard to visualise both real-time and historical data.

Join us:

△ **Cyber Physical (virtual)**: 18th & 19th June

25th & 26th June

Training outcomes covered:

△ **Introduction to Edge Computing**

△ **Selecting and configuring an edge device**

△ **Setting up cloud databases and dashboards**

△ **Manage connectivity through the system.**
